CFRP, a cutting-edge material, guarantees optimum strength and low weight. Stornetic's expertise in using this material allows an EnWheel to operate at up to 45,000 revolutions per minute. This extremely high rotational speed allows to maximise kinetic storage capacity, while only requiring a small machine footprint.

Stornetic bietet leistungsstarke und dynamische Stromspeichertechnologien für eine Vielzahl von Anwendungen. Entdecken Sie unsere Stromspeicherlösungen und ihre vielfältigen Einsatzmöglichkeiten.

Stornetic is a market leader in safety innovation, patenting specific technology as a result of our extensive testing. The ring membrane is a forward-thinking example of this innovation. A patent-registered component designed to sit between the EnWheel and its foundation, it ensures the machine has the mobility to safely spin while firmly ...

DuraStor is a smart power storage solution that can help overcome these power supply weaknesses, avoiding capital and production losses. Our modular power storage solution protects against unacceptable short-time voltage fails, and bridges the power supply to safely shut down your critical processes, or even to switch on additional power generators in standby.

For every new installation Stornetic experts are on hand to support customers. Depending on the business case, we can offer any level of assistance, from designing and delivering a concrete foundation for the flywheel system, to simply plugging it in.
