

Is EKS a good inverter provider?

At that time, Powin executive VP Danny Lu told Energy-Storage.news that EKS is an inverter provider with a strong track record of working on challenging grid-connected and off-grid projects; in other words, projects at the grid edge.

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

Does Powin own EKS?

Powin CEO Jeff Waters said today that even in the relatively short time EKS has been in its ownership, the system integrator has been able to leverage it for one of the world's biggest BESS projects to date: the 850MW/1680MWh Waratah Super Battery in New South Wales, Australia.

Why is Saudi Arabia's break-even oil price rising?

But challenges remain. Saudi Arabia's fiscal break-even oil price--the price per barrel needed to balance the budget--has risen, indicating continued sensitivity to oil price fluctuations. Its external break-even oil price has also increased, reflecting ongoing reliance on oil exports to finance imports.

Why is Saudi Arabia undergoing a significant economic transformation?

Saudi Arabia is experiencing a significant economic transformation under its Vision 2030 plan to reduce the country's dependence on oil revenues by diversifying its economy.
