

Does Fiji have a national energy policy?

Using external aid (German Technical Cooperation (GIZ) - Deutsche Gesellschaft für Internationale Zusammenarbeit and United Nations Development Programme (UNDP)), Fiji has been able to successfully review National Energy Policy for Fiji which acts as a guideline for the goals and objects to achieve by 2030.

Does Fiji have electricity?

The rest of the islands in Fiji are electrified through diesel generator sets, micro hydro systems or generators running on biofuel. The electrification of the off-grid population comes under Fiji Department of Energy (FDoE). . Selected PICs' demography and energy data. The access to electricity in Fijian households is not 100 %.

How can Fiji meet its energy needs?

In line with this plan, assessments have shown that a combination of solar, wind, geothermal, marine, biomass, and biofuel could be used to meet Fiji's energy needs. Currently, as much as 40 percent of Fiji's power is generated from diesel and heavy fuel oil, which is purchased via local companies from Singapore-based suppliers.

What are the responsibilities of energy institutions in Fiji?

The energy institutions in Fiji (Table 8), are responsible for energy planning, energy policy making, energy project financing, determination of energy prices (electricity tariff and fuel prices) and energy research. These institutions need to be well financed and adequately staffed to carry out its responsibilities effectively.

What is the future of Fiji's energy sector?

The future of Fiji's energy sector will continue to be shaped by these factors. Today, as much as 60% of Fiji's electricity generation is derived from hydropower while remote islands and some rural areas are largely dependent on energy production powered by imported fossil fuels.

Will Fiji be able to produce 100% of electricity by 2030?

10.3.1 To derive as close to 100% of electricity services from renewable energy sources as possible by 2030. In keeping with Fiji's climate change commitments and development goals, Fiji will systematically scale up the transition to renewable energy-based electricity production.
