

Why should you choose Siemens Wind power?

Providing highly reliable and cost-efficient wind turbines, Siemens Wind Power offers solutions to meet both business and environmental needs.

What is the world's most powerful offshore wind turbine?

Siemens Gamesa will install and test what has been described by the European Union (EU) as the "world's most powerful offshore wind turbine prototype" at the Østerild National Test Centre in Denmark, before later starting full-scale production of its "next-generation" offshore wind turbine model.

Will Siemens produce its biggest wind turbine?

Photographer: Nathan Laine/Bloomberg Siemens Energy AG (DE:ENR) has told customers it plans to produce its biggest wind turbine, potentially toward the end of the decade, as the company seeks to maintain its lead in one of the fastest-growing energy sectors.

Why is Siemens Energy's wind unit in trouble?

Siemens Energy's wind unit has been in turmoil due to supply-chain bottle necks, soaring costs and quality problems. Much of the pain has been from the onshore business, while it maintained its role as the biggest supplier of turbines for wind farms at sea outside China.

What's going on with wind turbines outside China?

Much of the pain has been from the onshore business, while it maintained its role as the biggest supplier of turbines for wind farms at sea outside China. Last year, the European Union granted EUR30 million to Siemens Gamesa to test what it said would be the "world's most powerful wind turbine prototype" at a facility in Østerild, Denmark.

Why should you choose Siemens Gamesa turbines?

Our onshore approach is focused on geared technology, in which we have extensive knowledge and expertise. The hallmarks of Siemens Gamesa turbines are: reliability, robustness and a modular, flexible design for optimum adaptation and maximization of production at any site and in all wind conditions.

Successful 4 Navitas vertical axis wind turbine developed with Siemens and HMK ; UK manufactured, self-starting, low resonance and low-maintenance ; A new micro-generating wind turbine for small businesses, farms and local communities

The order encompasses 28 SWT-3.0-101 direct-drive wind turbines for the Mount Lucas wind farm, located in County Offaly, around 80 kilometres west of Dublin and 14 SWT-3.0-101 ...

The production of the first power of one of the world's largest offshore turbines is another proof point in the

wind energy discourse. The wind industry has already amply demonstrated its ...

"The new Siemens wind turbine factory will create around 700 new local jobs once it is in production, as well as additional indirect jobs in the supply chain. With the anticipated growth ...

Siemens Gamesa is the fully owned wind business of Siemens Energy with more than 6,000 employees in the UK. Darren Davidson, UK and Ireland Vice President for Siemens Energy ...

Siemens Gamesa will install and test what has been described by the European Union (EU) as the "world's most powerful offshore wind turbine prototype" at the "sterile ...

For the past months we have been following the installation of our largest offshore wind turbine, and now, the SG 14-236 DD prototype has produced its first power! The culmination of this ...
