

Does Slovenia use oil to generate electricity?

Following steep declines in use since 1990, Slovenia eliminated the use of oil for generating electricity in 2019. Renewable energy sources other than hydropower (e.g., biofuels, solar PV, waste, and wind) together provided 3.5% of total electricity generation in 2019.

How much electricity does Slovenia use per capita?

Electricity consumption per capita exceeds 6 600 kWh (20% above the EU average). Slovenia's energy intensity has decreased at the same rate as the EU average (-1.9%/year over 2000-2019) and remained 25% higher in 2019. Benefit from up to 2 000 up-to-date data series for 186 countries in Global Energy & CO 2 data

What is the primary energy supply in Slovenia?

Total primary energy supply (TPES) in Slovenia was 6.80 Mtoe in 2019. In the same year, electricity production was 16.1 TWh, consumption was 14.9 TWh. The transportation and industrial sectors were the largest consumers of energy in Slovenia in 2019.

Does Slovenia have an electricity interconnection plan?

Slovenia has already achieved the electricity interconnection level aimed of at least 15%. Besides information on the new electricity and gas infrastructure projects, the draft plan contains limited information on general market functioning and does not yet include any specific objectives and targets relating to the internal market dimension.

What will Slovenia do with renewables in 2020?

Under the EU Climate and Energy package, Slovenia was expected to raise the share of renewables in final consumption to 25% in 2020, of which 39% for electricity, 30.8% for heating and cooling, and 10.5% for transport.

How many wind turbines did Slovenia have in 2022?

Slovenia had just 2 wind turbines in 2022. Onshore wind energy potential for Slovenia is typical of central and eastern Europe. A northwest to southeast band of higher potential wind energy is found across far southwest Slovenia, roughly between Gorizia, Italy and Rijeka, Croatia.

The aim of this package of measures is to make Europe the world's first climate-neutral continent by 2050. How will the Green Deal impact the energy sector and its future development? The ...

Slovenia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...
