Who are Manx solar electrical?

Manx Solar Electrical are the Isle of Man's exclusive Stiebel Eltron service partners. We are also a Mitsubishi ASHP service partner and Dimplex approved and accredited installers. Our engineers install high performance JA Solar /REC and Sun Power solar modules together with SolarEdge optimisers and inverters.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

Those will be your big power draws. You need to concern yourself with max combined draw. If you run 2 280ah batteries in parallel with a bms on each the bms can be smaller because the load is split. Example, if you used a 120amp overkill solar bms on each bank of 280ah batteries you could draw 240amps of current at 12v at the same time.

Just ordered 32 of the EVE 280AH cells for my first DIY LiFePO4 build for an off grid solar system using two MPP Solar 3KW inverters (paralleled) and 5KW PV array. First question; which is better, a) two banks of 16 cells, each with a separate BMS, then connected in parallel (16S,2P); or b)...
