3. Hybrid Inverters. Hybrid inverters are string inverters that can connect a storage battery to the solar PV system so the system will still work in the event of a voltage drop. Thus, a single unit will connect the panels and the battery. Lately, hybrid model prices have started dropping, being just as affordable as classic inverters.

Solar Inverter Price in India. A solar inverter is a type of electrical converter which converts the DC (direct current) into a utility frequency AC (alternating current) that can be fed into a main grid in on-grid solar system. And vice versa in off grid solar system and hybrid solar system is very important part of a solar system.
