

The average daily solar irradiance in Sudan varies in between 5.8 and 7.2 kilowatt hours per square metre . The solar irradiance needed to create solar power is readily available in almost all regions of Sudan. The solar irradiance is highest in northern Sudan . For that reason, the northern area has been selected as the location for this project.

Furthermore, they predict that upwards of 80% of the bulk material in solar panels will be recyclable; recycling of solar panels is already economically viable. However, certain steps in the production chain of solar PV systems involve the use of toxic materials, e.g. the production of poly-silicon, and therefore require

Solar Panel Installation. The U.S. Embassy in Baku is delighted to announce that we partnered with the Landmark Business Complex in Baku to install an array of solar panels on the roof of the building. As of July 5, 2022, our office at the Landmark has been mostly powered by solar energy.

Ideally tilt fixed solar panels 5°; South in Juba, South Sudan. To maximize your solar PV system's energy output in Juba, South Sudan (Lat/Long 4.8499, 31.5812) throughout the year, you should tilt your panels at an angle of 5°; South for fixed panel installations.
