

Germany has stood at the vanguard of solar energy adoption for decades. Now, as older solar panels begin to reach the end of their life, Germany will once again be at the forefront--this time to answer the question: What are we going to do with all the solar panel waste? Eyes are on Solar Energy to Address Climate Concerns At the end of October, the United Nations climate ...

Solar power wherever there is either no power grid available or where current development would mean exorbitant costs. The solar modules of SOLARA are the product of German workmanship and are manufactured exclusively in Germany. Thanks to the high quality of the materials used and their manufacturing, they are extremely robust and durable.

At Sunvitar, we've been warm to the idea of efficiently converting sunlight into renewable energy for a long time. Our partner, Sunpower Solar Technology, has been operating since 2007 and produces high-end solar panels. Thanks to their patents and certificates in solar tech, we now distribute solar solutions across Germany and Europe.

The solar film has an integrated backside adhesive, which means that it can be easily glued on the surface and can be connected and used immediately due to the integrated connection cables. HeliaSol is the perfect solution for retrofitting buildings where restrictions in terms of weight, static load restrictions or penetration of the roof ...
