

Back in 2009, when SolarQuotes kicked off, solar panels cost a bomb: about 20 times more than what you'd pay today. This massive price drop means you can fill your roof with solar without stressing too much about the cost. You don't even need to stress about having your panels perfectly angled or facing the ideal direction. They're such good value now that even if ...

MetaSolar company was founded in 2012 as a result of the desire to produce renewable energy mainly from solar energy. We want to build a network of distributors and solar installers in the entire country by providing them with necessary products and materials for installation, specialized training and seminars where we are giving all of the necessary information for a ...

With an average of 1,900 to 2,400 annual sunlight hours, Romania has significant natural potential for solar PV development. Yet, the country has not set ambitious targets for renewable energy sources, aiming for only 30.7% of its final energy consumption to come from RES by 2030. For solar, this translates into an objective of 5.05 GW, which

So I started looking into solar recently and got really excited at first. We got a quote from a pretty large solar installer in the area. They had said in their sales pitch our average monthly electric bill was \$191/mo and with financing we would pay \$234/mo for the panels on a 20 year loan (\$45k for 9.7kwh system)
