There are no upcoming events. You can check back soon. Thank you

How many electricians live in Solomon Islands?

Further complicating matters,in 2016 only 60licensed electricians lived in the country and all resided in the capital,Honiara. While the World Bank has invested significantly in sustainable energy programs in Solomon Islands,particularly in hydropower and clean energy access,many challenges still remain.

Why is there a low level of electrification in Solomon Islands?

The low level of electrification in Solomon Islands is due to systemic,economic,and geographic barriers to expanding the grid. A low population density and urbanization rate,combined with geographic remoteness and the logistical challenges of expanding grid infrastructure in an island country,result in high costs for initial development.

Is biomass a source of electricity in Solomon Islands?

Traditional biomass - the burning of charcoal,crop waste,and other organic matter - is not included. This can be an important source in lower-income settings. Solomon Islands: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does the RBF approach fit the challenge of electrifying Solomon Islands?

The RBF approach for energy access fit the challenge of electrifying Solomon Islandsfor several reasons. Initial high upfront costs created significant affordability challenges for people in Solomon Islands. Based on an initial World Bank assessment,the willingness to pay for electricity was quite evident.

How many households are connected to the electrical grid in Solomon Islands?

In Solomon Islands,only 16%of households are connected to the electrical grid. The low level of electrification in Solomon Islands is due to systemic,economic,and geographic barriers to expanding the grid.

The Solomon Islands government has set a 50% renewable energy use for power generation by 2020 to be achieved through its Tina Hydro Development Project and the Savo Geothermal projects, both developments to be commissioned by the end of 2017.---Rural Households Electrification Targets: Diesel self-generation 5% in 2015 5% in 2020, 3% in 2030.
