Wind power, solar, tidal, biomass, and heat pumps are among a few technologies that comprise the renewable energy industry. These technologies may be implemented by small, medium and large companies and projects and installation may vary on scale and terms of their environment. The uptake of Renewables is increasing and as such needs to be regulated to the same health and ...

The Cobo Balcony Gigs took an environmentally conscious step forward, with the Little Green Energy Company powering the final event using solar power generated from the company's Homefield site. The Balcony Gigs ...

The remaining on-island demand was topped up by Guernsey's community solar PV arrays and the power station. A GoO is an electronic certificate issued for every megawatt hour (MWh) of electricity ...

At Solar Panels Network, we make solar panel installation in Guernsey an attractive process without compromising on its efficiency. All of the providers in our network have been thoroughly researched and vetted to ensure that they deliver the best design, installation, and services.

The import cable alone does not meet the islands electricity needs when energy demand is at its greatest. The GJ1 cable can provide 100% of Guernsey's energy needs in summer and around 75% in winter, so the power station is still required as both a top-up for the winter peak periods and as a back-up when the GJ1 interconnector requires to be switched off for maintenance.

Solar Bioenergy completed a SEK 22bn long-term financing in February 2024. The new Group financing is based on an investment grade rated Common Terms Agreement Platform with international banks and institutional investors. CIBC ...
