How can I generate my own electricity in Spain?

Generate your own electricity in Spain with solar power. A solar panel installation provides a fantastic return on investment and, with the savings you will make on your electricity bill, your solar panels will pay for themselves in just a few years! At Mariposa Energy we take care of the whole process for you.

Is solar electricity a good investment in Spain?

A typical system can produce around 80% of the electricity a household uses in a year and has a life expectancy of over 25 years. Constant increases in electricity prices here in Spain and the dramatic reduction in the cost of solar equipment means that solar electricity is now a very sound and risk-free investment.

Which latitude is best for solar panels in Spain?

Spain lies between 36° and 43° north latitude. This affects the efficiency of solar panels. The closer to the equator, the more solar energy there is. That's why we adjust the tilt and orientation of the panels to suit the location.

What services does ecosolarspain offer?

Our services include solar panel installations, electric car chargers, energy-efficient HVAC systems, heat pumps for pools, all designed to optimize your energy usage and promote a greener lifestyle.
