

Is solar energy making a comeback in Sudan?

Fortunately, the country is now witnessing a comeback to solar energy as it is an effective tool to drive development, employment, and stability - particularly in rural and agriculture-focused communities. "In Sudan, access to energy is a critical tool, and solar is an effective way to achieve this.

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

What should Sudan's government do about solar energy?

Mr. Afanasiev advised the Sudan's government to continue its current direction of expansion of renewable energy solutions and continue efforts to make solar technology as accessible as possible. The cost should be reduced by tax and duty exemptions.

Does Sudan have solar energy?

Solar energy has the greatest potential for use in Sudan compared to other forms of RE. Sudan possesses an average annual radiation range of 436 to 639 W/m² per year, which exceeds the annual global average. The period of solar radiation in the country is between 8.5 and 11 hours per day .

Is solar a viable alternative to fossil fuels in Sudan?

"In Sudan, access to energy is a critical tool, and solar is an effective way to achieve this. First, it is an alternative to fossil fuels, so importation and transport challenges are avoided, environmental benefits provided, and ongoing fuel costs eliminated.

Is Sudan's Energy Sector Sustainable?

Further, Sudan's energy sector is currently subsidised by the government. Government subsidies to the sector totalled \$667 million in 2019. This represents 13.5% of total government expenditures . Financial sustainability could be achieved by introducing gradual tariff adjustments.
