We exist to set our customers" innovations into motion by engineering and delivering advanced technology for battery packs, chargers, docking stations and power supplies. We champion innovation as a catalyst for our customers" success.

At the Battery Medical Conference in Anaheim, CA, Chris Turner, Chief Technology Officer at Inventus Power, delivered a presentation titled "Exploring Cell Technology for Medical Applications," where he gave an in-depth analysis of the landscape surrounding batteries for medical applications, emphasizing the geopolitical concerns and market dynamics ...

Because the energy density is greater in a Li-ion battery than lead-acid, the result is a lower mass unit that stores more energy in the same footprint. Lower mass, especially if these battery systems need to be lifted and installed on a high platform, makes Li-ion the easier option in terms of storage and labor.
