The wetter season lasts 8.2 months, from July 21 to March 28, with a greater than 18% chance of a given day being a wet day. The month with the most wet days at Svalbard Airport, Longyear ...

Two territories of the kingdom of NORWAY, Svalbard and Jan Mayen are outposts for hunting, mining, and scientific activity far to the north of most human settlement. The islands are located north and northwest of Norway, within the southern limits of Arctic sea ice-- the northernmost point of Svalbard is within a 620 mi (1,000 km) of the North Pole.

The flora of these islands in the European sector of the Arctic does not differ greatly from the general aspect of the flora of Greenland in the west, Franz Josef Land and Novaya Zemlya in the east, or Kola and northernmost Norway in the south. This especially concerns Bear Island and Jan Mayen, both of which are inhabited by a meager flora.

Population of Svalbard and Jan Mayen: Current, historical, and projected population, growth rate, median age, population density, urbanization, and urban population. Data tables, maps and charts. ... 1800 346 -5.4% -25 1900 649 6.5% ...
