

Which energy sources are used in the transport sector in Azerbaijan?

Most oil products used in the transport sector are produced in Azerbaijan. TFC consists mainly of natural gas (43%) and oil products (39%), followed by electricity (15%). Renewable energy sources, including hydro, contributed 1.5% to total energy supply in 2022 and 6% (1.8 TWh) to electricity supply.

How much energy does Azerbaijan need?

Azerbaijan's energy demand (measured as total energy supply [TES]) was 16.1 million tonnes of oil equivalent (Mtoe) in 2022 (according to preliminary data from the State Statistical Committee). Azerbaijan is a major producer of crude oil (32.7 Mt including natural gas liquids in 2022) and of natural gas (35.0 bcm in 2022).

What regulatory regimes apply to oil & gas production in Azerbaijan?

Two basic regulatory regimes apply to oil and gas exploration and production in Azerbaijan: the system established under the Law on Energy and implemented through energy contracts, and regimes particular to each case established by specific production sharing agreements (PSAs).

Is oil price volatility affecting Azerbaijan?

Azerbaijan has undergone significant economic transformation since gaining independence in 1991, with its large oil and gas reserves driving strong growth in the 1990s and 2000s. However, its heavy dependence on extractive industries has left Azerbaijan exposed to the negative effects of oil price volatility.

The Azerbaijan-Türkiye III Energy Forum, held in Nakhchivan on Sept. 29, 2023, was focused on establishing Nakhchivan as a "green energy region." During the forum, discussions centered ...

Azerbaijan's economy has long been centered on its hydrocarbon sector. The world's first industrial oil well was drilled in 1847 at Bibi-Heybat on the outskirts of Baku; by the turn of the twentieth century, Azerbaijan was producing over half of the world's oil. The Soviet period, Baku continued to be a major supplier of oil--though production declined in later years.
