

Overview About History Industries and applications Technology Financing Skeleton Technologies is an energy storage developer and manufacturer for transportation, grid, automotive, and industrial applications. Skeleton is developing a novel raw material, curved graphene, to produce solutions for the energy storage market, including high-power supercapacitors and high-energy solid-state batteries.

25 MWh at the Carling multi-energy site. The battery-based ESS facility at the Carling platform came on stream in May 2022 and comprises 11 battery containers. The facility has a storage capacity of 25 MWh, thereby reinforcing ...

Elektriraudtee trains meeting at Tondi Station in Tallinn. Two "old-timers" meeting at Tondi station in Downtown Tallinn. The one on the left is RVR ER2S 2205/2206 (same train also featured on ...

Evecon, an Estonian renewable energy company, and Corsica Sole, a French company, will build two battery energy storage systems with a total capacity of 200 megawatts in Harju County by 2025. The battery parks ...

Marubeni will start to work on sales of Skeleton's ultracapacitors and develop the use cases and markets of its next generation energy storage technology with Skeleton in Japan and other Asian countries.

The new solar park complements the already existing V&#228;o energy complex of Utilitas, where green energy is produced in two combined heat and power plants, and in one smaller solar park. Next year, both green ...

Founded in 2001, by current CEO Enn &#213;unpuu, Elcogen is a manufacturer of clean energy technology that delivers affordable green hydrogen and emission-free electricity. We supply the core technology that sits at the heart of energy ...
