

Teachers need to accumulate energy over time

Is time pressure causing a teacher's emotional exhaustion?

Many teachers experience high levels of work-related strain due to time pressure, which over time can lead to various health problems, such as emotional exhaustion. However, there is growing evidence that this could be a reciprocal effect.

Do teachers feel time pressure across a school year?

Thus, teachers' perceived time pressure across one school year coincided to a great extent with the emotional exhaustion they experience across the same school year. We expected this relationship to be dependent on the amount of social support a teacher receives from the school principal.

Does time pressure affect teacher performance?

Hindrance demands have a negative effect on employees' motivation, satisfaction, and performance whereas challenge demands have a positive impact on employees. Time pressure may also have favourable effects on other unexamined teacher outcome variables.

How can teachers meet their professional demands?

To meet their professional demands, it is important that teachers remain motivated and healthy at their work. However, many teachers experience high work pressure, lack of recovery time, and exhaustion (Sandmeier et al. 2017).

Can you still be a teacher for a long time?

But veteran educators say it is possible to remain vital as a teacher for years or decades. The key is to never let yourself fall into a rut, says Richard Miller, PhD, a professor of psychology at Texas A&M University-Kingsville and the current president of APA's Div. 2 (Society for the Teaching of Psychology).

Do teachers' perceived time pressure affect social support?

In addition, although the present results show that teachers' perceived time pressure is positively related to emotional exhaustion and negatively to the receipt of social support from the school principal, this does not need to be the complete picture.
