

Does Tejas Borja use solar energy?

Thanks to these technological developments, Tejas Borja has expanded its catalogue to include a range of products which harvest solar energy. These products integrate perfectly into the flat ceramic tiles in the "Flat" range so that they have minimal impact on the original design of the project.

Which Tejas Borja Solar tiles are compatible?

Tejas Borja's SOLAR range As another option in the Tejas Borja solar range, we offer a format compatible with our other flat ceramic tile model, the Flat-10. The SOLAR FLAT-10 tile is the same size as 5 ceramic tiles with the same model name and incorporates CIGS technology in its photovoltaic panel.

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

What is Tejas Borja?

In this context, Tejas Borja is joining a new revolution in roofing by having developed a single product which combines both style and energy efficiency. Thanks to these technological developments, Tejas Borja has expanded its catalogue to include a range of products which harvest solar energy.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.
