

What is esm-48100u2?

1 Product Description The ESM is an energy storage unit composed of lithium batteries. It features better than ordinary batteries. (ESMU), power and signal terminals, and mechanical parts. It can be used as a system. ESM-48100U2 48 V 100 Ah connected in parallel can reach 24 kW. For details, see 2.1 Parallel Connection Mode.

How deep is esm-48100u2?

ESM-48100U2 is 396 mm deep. Check the rack depth before installation. ? The ESM can be installed in a 19-inch rack with guide rails and a tray. Check whether the load-bearing capability meets requirements. ? If multiple ESMs are installed, clearances should be reserved. The average space for each ESM should be at least 3 U.

How to store ESM?

1. Place ESMs according to the signs on the packing case during storage. Do not put ESMs upside down or sidelong.
2. Stack ESM packing cases by complying with the stacking requirements on the external package.
3. The storage environment requirements are as follows:
4. The warehouse keeper should collect ESM storage information every month

What is undervoltage of ESM?

Undervoltage 1. The ESM voltage is 1. The mains power failure has protection less than 44 V. lasted for a long time. 2. The minimum 2. Cells are not consistent. The high. Charge high The maximum 1. The ESM ambient temperature electrochemical cell temperature is too high. protection temperature is greater 2. There are abnormal heat

How to install ESM?

Step 1 Wear the protective gloves. Step 2 Install the ESM ground cable. Step 3 Install the ESM communications cables. CAUTION the COM_OUT port of the last ESM. Step 4 Assemble an OT terminal with the ESM power cable. Step 5 Install negative and positive power cables of the ESM. CAUTION OT terminal on the cable faces outward. the ESM in parallel.

How to install ESM activation cables?

Perform the following steps to install the activation cables. 1. Locate the ESM activation cable and cable terminals in the fitting bag. 2. Install the activation cable at the terminals. 3. Install one end of the activation cable at a PWR port of the ESM. 4. Install the other end of the activation cable at a load route (BLVD route power system).

Huawei - ESM-48100U2 01075496-013. BATERIA DE LÍTIO 48V-100Ah 19"" Comprar Alugar *Transforme seu Capex em Opex através da nossa modalidade de locação, a TaaS.
