

What is the energy sector development project for Tuvalu?

The objective of the Energy Sector Development Project for Tuvalu is to enhance Tuvalu's energy security by reducing its dependence on imported fuel for power generation.

Should energy data be consolidated in Tuvalu?

One of the study's recommendations is the consolidation of all energy data, to build an energy balance and to include it in the annual economy report. Since Tuvalu's electricity generation efficiency is low, around 35%, the significance of the electricity sector is higher in the primary energy balance than in final end-use consumption.

What is the main source of energy in Tuvalu?

The primary energy consumption represents the upstream supply. The only national energy source is biomass (18% of total consumption). Photovoltaic and thermal solar contribute for less than 1%. The balance of supply is oil (Fig. 2). Tuvalu is close to being a totally oil dependent economy.

Why does Tuvalu use a lot of electricity?

A large proportion of Tuvalu's electricity consumption is a function of the energy efficiency of imported products. It is in the nation's economic interest to set up minimum performance levels for imported household and professional equipment: lighting, cooling, cooking, washing, television sets and other electronics equipment.

How much energy is wasted in Tuvalu?

Only 3,232 toe (71%) of primary energy supply reached an end-use category. 1,341 toe (29% of primary energy supply) was wasted, mainly due to low electricity generation efficiency. Tuvalu's electricity consumption is increasing rapidly at a 3.8% yearly average rate over the last ten years. It reached 4,121 MWh in 2004.

What is the balance of supply in Tuvalu?

The balance of supply is oil (Fig. 2). Tuvalu is close to being a totally oil dependent economy. In 2004 the total energy consumption was 4.6 ktoe, oil accounting for 3.8 ktoe (82%) and biomass for 0.8 ktoe (almost 18% of the total primary energy consumption).

This Renewable Energy Master Plan is the outcome of the Government of Tuvalu vision made in 2008 for Tuvalu to become 100% renewable energy for all its power generation by the end of ...

Tuvalu: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key ...

David is our Executive Vice Chairman and former Chief Executive Officer. He is an integral part of our

management team. A trained theoretical physicist, he was one of the founders of the ...
