

What is upowa inline solar?

UPOWA Inline Solar delivers a 410W power output per solar module, making it one of the most powerful roof-integrated solar systems on the market. With design flexibility and maximised power built in, housing developers can achieve carbon reduction targets with fewer solar panels. This saves roof space, material costs and installation time.

How has upowa helped Anglian Water achieve net-zero?

UPOWA delivered 14.4 MW of commercial solar, reducing Anglian Water's operational costs and carbon emissions, whilst accelerating their journey to net-zero. We installed 65.48 kWp of UPOWA Inline Solar for energy-efficient new homes in Portslade, constructed by Thakeham Group for housing association Clarion Housing.

Does upowa have a warranty?

Fitted by our expert, MCS-accredited delivery team, your UPOWA solar PV system comes with a 2-year workmanship warranty, which can be extended for added peace of mind. We've been fitting solar panels since 2008 and in that time, we've completed over 21,000 installations for new homes across the UK.

Why should you choose upowa solar panels?

Solar panels help protect you from rising energy costs and even add value to your home. Fitted by our expert, MCS-accredited delivery team, your UPOWA solar PV system comes with a 2-year workmanship warranty, which can be extended for added peace of mind.

What services does upowa offer?

A call center is also available to help upOwa clients with any trouble they might face. PAYG stands for Pay-As-You-Go, which means our clients can pay for a solar home system in regular, flexible installments all the while using their product. Monthly payments are equivalent to the monthly cost of kerosene lamps.
