

The construction-ready project is one of the largest battery storage projects in Europe and is Gore Street's largest acquisition to date. The site in Heysham, North West England, is located near the landing point of six offshore wind farms and will support Gore Street's mission to integrate greater levels of renewable generation using energy storage.

Gore Street Energy Storage Fund has acquired an 80MW energy storage project from RES, having also entered into exclusivity with the renewable energy company for over 300MW of assets. The 80MW project - located in Milton Keynes - is construction ready, with all land rights, grid connections and planning consents having already been secured.

Gore Street Energy Storage Fund has acquired a 200MW battery storage project in development by Kona Energy. It marks the stock exchange-listed energy storage investment fund's single largest project acquisition to date, bringing its total portfolio of contracted or operational battery energy storage system (BESS) assets to 898MW.

Gore Street Energy Storage Fund's Kilmannock battery energy storage system (BESS) in Co. Wexford, Ireland, has received an additional grid volume allocation of 90MW, building on the 30MW currently secured. ... This also saw 1,533MW of solar, six hybrid solar-plus-storage sites consisting of 325MW of solar and 441MW of battery storage and ...

The CAISO project in Imperial County will complement the region's abundant renewable energy generation, improving grid stability. LOS ANGELES and SAN FRANCISCO, Calif -- February 17, 2023 Avantus (formerly 8minute) today announced the sale of Big Rock 1 energy storage project to Gore Street Energy Storage Fund plc (LON: GSF), a London-based ...

The Big Rock storage project is a large standalone battery facility adding 200 MW / 400 MWh of storage to the grid. The project will receive contracted revenues from the California Resource Adequacy program. Gore ...

A roundup of battery storage news in the UK, with projects from Centrica, Pulse Clean Energy, Habitat Energy and Gore Street, as the country's operational capacity reaches over 3GW. The flurry of project news, alongside ...

Gore Street Energy Storage Fund has acquired a 57MW construction-ready energy storage project in Leicester. All land rights, grid connections and planning consents have been secured for the project, which is currently scheduled to become operational in 2023. ... Gore Street will now issue up to 67,883,824 new ordinary shares at a price of 107 ...

Two of those leading the way, Gresham House Energy Storage and Gore Street Energy Storage, have dividend yields above 5 per cent and posted total returns of 23 and 20 per cent, respectively, over ...

The UK-headquartered battery energy storage fund highlighted the impact of rising short-term inflation, rising interest rates, high foreign exchange (FX) volatility and increasing construction costs on its portfolio. ...

UK investor Gore Street Capital, through its Gore Street Energy Storage Fund (GSF), has acquired a 75MW/150MWh early-stage battery storage project in the Lone Star State. The project is expected to come online in the second half of 2024, and brings the fund's total portfolio of projects to 937MW across the UK, Ireland, Germany and US.

The project was acquired by Gore Street Energy Storage Fund (which trades under the GSF ticker) in February last year and will come online in December 2024.. The RA contract is worth over US\$14 million annually, will start in Summer 2025 and is fully "stackable", meaning GSF can still combine it with other revenues from wholesale trading and ancillary ...

London Stock Exchange-listed Gore Street Energy Storage Fund (GSF) has secured a US\$80 million increase in debt facilities for its battery storage projects. The fund, overseen by renewable energy equity investor Gore Street Capital, has upsized two existing facilities with lenders First Citizens Bank and Banco Santander, it said in a regulatory ...

A 50MW battery storage site in Northern Ireland, UK, has been energised by developer Low Carbon and investment fund Gore Street Energy Storage Fund. The lithium-ion project, located at Drumkee, County Tyrone, is being lauded as the country's largest energy storage project and is to serve the Single Electricity Market. It was completed on time ...

A 50MW battery storage site in Northern Ireland, UK, has been energised by developer Low Carbon and investment fund Gore Street Energy Storage Fund. The lithium-ion project, located at Drumkee, County Tyrone, is ...

Rapid advancements in battery technology have enabled grid-scale battery storage systems to emerge as a key solution to solar and wind intermittency, as well as to serve as a pivotal tool in avoiding major grid outages and blackouts. Business Model. Gore Street is a pure-play energy storage investor.
