

What is wetility & how does it work?

Wetility enables you smartly generate solar power on your rooftop, then seamlessly store, release and monitor clean energy to your home or business. We believe that we are here to harness the sun's power with purpose, introducing you to a hybrid solution that works seamlessly and in tandem with your current power options.

What is wetility's flagship product?

Wetility's flagship product is a comprehensive digital solar energy management system that allows users to regulate power usage remotely. Wetility may be growing as it has secured significant funding to support its operations and expansion.

What is a wetility system?

The Wetility hardware series - which could be one of the PACE, RISE or LIFT series systems - connects to the grid but can function independently during outages. It generates, stores, and automatically uses energy, saving costs and ensuring power supply.

Does wetility offer a flexible financing model?

The upfront costs, however, have been a major constraint for most. Wetility offers a flexible financing model that's similar to a mortgage - customers pay monthly and eventually own the installed solar solution after a given term. To learn more about the company's innovative approach, we chatted to Vincent Maposa, CEO of Wetility.

What is wetility pace?

We locally design and build the Wetility Pace (our all-in-one hybrid inverter and lithium ion batteries) and the proprietary software and pull this together to offer customers a one-stop location to access high-quality solar service that is affordable.

Does wetility offer battery replacement?

Our Wetility lease options can also include battery replacement. The STRIDE system comes with a 5-year warranty. The Lithium-ion batteries we use are rated for 3000+ full equivalent cycles and offer a strong shelf life. Is solar energy sufficient for off-grid living, especially with appliances like stoves?

Wetility is now providing its new Essentials Series. The Essentials Series - which officially launches on the 16th of January 2023 - is a series of solar and solar-compatible power solutions geared at providing low cost and ready-to-go but high reliability power access for your home essentials.
