

When cabinet self-cooling outdoors dont line up

I finally pull a pantry door out and the mortises don't align with the hinge location. They're about 1/2" off, which is just close enough to make drilling new holes for the hinges a bad idea, and ...

If you use wood (e.g. 1/2" thick boards, or something) you'll have to cut into the vertical supports to get everything flush with the wall. This all takes a fair amount of effort, though. If you don't ...

After I installed the ssd, cpu and memory I noticed that the screw holes from my motherboard dont line up with the holes on my pump. I thought it would be compatible since pcpicker ...

The cabinet design allows natural wind cooling through filtered vents on the front door and venting under the lip of rain hood. The outdoor server rack cabinet comes 2 or 4 fans with a dust-proof ...
