The best battery type for solar panels depends on your needs. Lithium-Ion batteries are popular for their longevity and efficiency, offering a lifespan of 10 to 15 years. Lead-Acid batteries are more affordable but have a shorter lifespan of 3 to 5 years. Consider factors like cost, maintenance, and energy requirements when choosing.

Therefore, the number of solar panels connected in the string must be equal to or more than Equation (7). We can use the solar panel starting at 100W to 300W. It is better to use higher power rating solar panels. For 900W output, we can use three 300W solar panels connected in parallel.

In Jamaica, the government has implemented several incentives and grants to encourage the adoption of solar panels and battery storage systems for both homeowners and commercial businesses. One of the primary incentives is the Net Billing Program, which allows solar system owners to sell excess electricity back to the grid at a predetermined rate.
