Horizontal axis wind turbines are the most common type. They resemble the large commercial wind turbines and have three main components: the wind rotor, the tower, and the generator. The wind rotor usually consists of three or more blades that automatically adjust their position based on the wind direction.

Increase your renewable energy sources with the FLTXNY 5KW-10KW Vertical Wind Generator. With 3 blades and 250 RPM, it efficiently produces clean energy for your home in 96V, 120V, 220V, or 380V. Its 3-phase design reduces noise, making it perfect for residential use. Expertly designed for reliable and quiet performanc
