How much power do solar panels use?

A 48V, 100Ah (4.8KWhr) lithium battery. In a well-designed solar system, no power should be drawn from the batteries during the day. On a sunny day, the power from the panels should be enough to charge up and keep the battery charged with excess power to run any appliances you need to run.

How do I sizing a solar panel?

When sizing solar systems it is recommended that you use the STC values for the power a panel produces. The NOCT/NMOT values are not really crucial for sizing. These STC values are the values that panels are rated with so if a panel is said to be 400 Watts that will be the STC value. -Air mass of 1.5. -Wind speed of 1 meter per second.
