After the purchase and installment costs of the solar panels, the production of solar energy costs nothing: there's enough sunlight to go around, and utilizing it doesn't pollute or make noise. In Southern Finland, a solar panel with a surface area of one hectare has an energy production potential equivalent to 330 hectares of forest, which ...

In combination with innovation, &#197;land's aspiration is to become a pioneer in green energy in the Nordic countries. Wind power already accounts for 90% of &#197;lands electricity production. The move toward even greater production of renewable energy through large-scale solar power farms and offshore wind farms is already well underway.
